

M.PHARMACY
INDUSTRIAL PHARMACY

I SEMESTER

Paper 101	-	Modern Analytical Techniques
Paper 102	-	Research Methodologies
Paper 103	-	Advanced Biopharmaceutics, Pharmacokinetics & Physical Pharmaceutics
Paper 104	-	Advanced Pharmaceutical Technology
Paper 105	-	Advanced Biopharmaceutics, Pharmacokinetics & Physical Pharmaceutics - LAB
Paper 106	-	Advanced Pharmaceutical Technology - LAB
Paper 107	-	Seminar

II SEMESTER

Paper 201	-	Advances In Drug Delivery Systems
Paper 202	-	Industrial Pharmacy - I
Paper 203	-	Industrial Pharmacy - II
Paper 204	-	Drug Regulatory Affairs
Paper 205	-	Advances in Drug Delivery Systems - LAB
Paper 206	-	Industrial Pharmacy – I - LAB
Paper 207	-	Seminar

III SEMESTER

Paper 301	-	Project Seminar-I (On the proposed project work with aims and objectives) - 50 Marks
Paper 302	-	Project work - I

IV SEMESTER

Paper 401	-	Project Seminar-II (On the experimentation and results of the project work) – 50 Marks
Paper 402	-	Project work - II

SCHEME OF INSTRUCTIONS AND EVALUATION

INDUSTRIAL PHARMACY

FIRST SEMESTER

Paper No.	Title of the Paper	Evaluation / Marks				Total	Credits
		Theory		Practical			
		Mid Examination	University End Examination	Mid Examination	University End Examination		
Paper – 101	Modern Analytical Techniques	40	60			100	3
Paper – 102	Research Methodologies	40	60			100	3
Paper – 103	Advanced Biopharmaceutics, Pharmacokinetics & Physical Pharmaceutics	40	60			100	3
Paper – 104	Advanced Pharmaceutical Technology	40	60			100	3
Paper – 105	Advanced Biopharmaceutics, Pharmacokinetics & Physical Pharmaceutics			40	60	100	2
Paper – 106	Advanced Pharmaceutical Technology			40	60	100	2
Paper – 107	Seminar					100	2
	TOTAL					700	18

SECOND SEMESTER

Paper No.	Title of the Paper	Evaluation / Marks				Total	Credits
		Theory		Practical			
		Mid Examination	University End Examination	Mid Examination	University End Examination		
Paper – 201	Advances in Drug Delivery Systems	40	60			100	3
Paper –202	Industrial Pharmacy- I	40	60			100	3
Paper – 203	Industrial Pharmacy- II	40	60			100	3
Paper – 204	Drug Regulatory affairs	40	60			100	3
Paper – 205	Advances in Drug Delivery Systems			40	60	100	2
Paper – 206	Industrial Pharmacy-I			40	60	100	2
Paper – 207	Seminar					100	2
	TOTAL					700	18

THIRD AND FOURTH SEMESTERS

Paper No.	III Semester	Total	Credits ***
Paper - 301	Project Seminar – I (On the proposed project work with aims and objectives)	50	2
Paper - 302	Project work - I	----	20
	Total	50	22

Paper No.	IV Semester	Total	Credits ***
Paper - 401	Project Seminar – II (On the Completed project work)	50	2
Paper - 402	Project work - II	---	20
	TOTAL MARKS	50	22
	GRAND TOTAL FOR THE COURSE	1500	80

M.PHARM SYLLABUS FOR INDUSTRIAL PHARMACY
I Semester

PAPER 101 - MODERN ANALYTICAL TECHNIQUES
(Paper Common for all Specializations)

Principles, instrumentation and applications of the following Instruments and Chromatography techniques

Unit- I

- i. UV- Visible spectrophotometry
- ii. Infrared spectroscopy
- iii. Spectrofluorimetry

Unit- II

- i. NMR spectroscopy
- ii. Electron Spin Resonance spectroscopy
- iii. Atomic Emission spectroscopy

Unit- III

- i. HPLC
- ii. HPTLC
- iii. Exclusion chromatography
- iv. Super critical fluid chromatography

Unit- IV

- i. Mass Spectroscopy including LCMS & GCMS
- ii. GLC

Unit- V

- i. Plasma Emission spectroscopy
- ii. X-Ray diffractometry
- iii. Optical Rotatory Diffusion
- iv. Vapor phase chromatography
- v. Affinity chromatography
- vi. Ion-exchange chromatography

TEXT BOOKS

1. Practical Pharmaceutical Chemistry Vol. 1 &II by Beckett & Stenlake.
2. Instrumental Methods of Analysis by Scog and West.
3. Instrumental Methods of Analysis by B.K.Sharma
4. Vogel's text book of Quantitative Chemical Analysis.
5. Instrumental methods of Analysis by Willard & Merrit.
6. A text book of Pharmaceutical Analysis by K. A. Connors.

REFERENCE BOOKS

1. I.P.
2. B.P.
3. U.S.P.
4. Remington's Pharmaceutical Sciences.
5. Spectroscopy by Silversterin

PAPER 102 -RESEARCH METHODOLOGIES
(Paper common for all Specializations)

UNIT I

Statistical Methods:

Chance Variation – Probability Distribution - Normal Distribution – Sampling Distribution
Error and its significance-Measures of Error- Control of Error in Experimental Investigations –
Problem Solving.

UNIT II

Correlation and Regression, Multiple Regression - Problem Solving

UNIT III

Tests of Significance: Principles, t-test, z-test, F-ratio test, Chi-square test, Non-parametric
tests- their applications in pharmacy research with examples – Problem Solving

UNIT IV

Design of Experiments

Criteria of a good design with examples.

Principles- Randomization, replication and local control.

Study of CRD, RBD, LSD and factorial designs- their applications in Pharmacy research with
examples – Problem Solving

UNIT V

Analysis of Variance (ANOVA) – one way, two way and three way – principles and
applications in pharmacy research- Problem Solving

Optimisation Techniques : Optimisation Techniques based on Factorial Experiments - Problem
Solving.

Text & Reference Books:

1. Fundamentals of Biostatistics by Khan & Khanum, 3rd Revised Edition, Ukaaz Publications, Hyderabad
2. Theory & Practice of Industrial Pharmacy by Leon Lachman and Others
3. Remingtons Practice of Pharmaceutical sciences, (Latest Edition)
4. Principles of Biostatistics by Marcello Pagnano, Published by Brooks/Cole, (Saurabh Printers Pvt. Ltd)

PAPER 103 - ADVANCED BIOPHARMACEUTICS, PHARMACOKINETICS & PHYSICAL PHARMACEUTICS

Unit - I

Bio-availability Bioequivalence and Therapeutic equivalence: Designing of bioavailability studies and interpretation of results.

Physicochemical properties affecting bioavailability, pH-partition theory, dissolution, surface area adsorption, complexation, polymorphism and techniques of enhancing dissolution rate.

Formulation factors affecting bioavailability of drugs in dosage forms of Tablets, capsules, parenterals, liquid orals and topical dosage forms.

Unit - II

Basic concepts of Pharmacokinetics: Compartmental models: One, Two and non-compartmental approaches to Pharmacokinetics. Recent trends, merits and limitations of these approaches. Application of these models to determine the various pharmacokinetic parameters pertaining to:

- a) Absorption: (wherever applicable) absorption rate constant, Absorption half time, lag time and extent of absorption, AUC.
- b) Distribution: Apparent volume of distribution and its determination.
- c) Metabolism: Metabolic rate constant
- d) Elimination: Over all apparent elimination rate constant and half life under the following conditions:
 - i. Intravenous bolus injection.
 - ii. Intravenous infusion.

Unit - III

Non-linear Pharmacokinetics: Concepts of linear and non linear pharmacokinetics, Michaelis - Menton kinetics characteristics. Basic kinetic parameters, possible causes of non induction, non linear binding, non linearity of pharmacological responses.

Time dependent pharmacokinetics: Introduction, classification, physiologically induced time dependency: Chronopharmacokinetics, chemically induced dependency.

Drug Metabolism - sites of metabolism, factors affecting drug metabolism (genetic, species and environmental).

Unit - IV

Particle science and powder technology: Crystal structure, Amorphous state, Polymorphism, particle size distribution, particle size analysis methods. Solid dispersions/solid solutions.

Physics of tablet compression: Compression, consolidation strength of granules, compression and consolidation under high loads, effect of friction, distribution of forces in compaction, force volume relationships, Heckel plots, compaction profiles, energy involved in compaction, strength of tablet, crushing strength, friability, lamination, instrumentation of tablet machines.

Unit - V

Rheology: Theoretical consideration, instrumentation, rheological properties of disperse systems and semi solids.

Polymer science: Properties of polymers, thermodynamics of polymer solution, phase separation, polymers in solid state, applications of polymers in pharmaceutical formulations

Kinetics and drug stability: stability calculations, rate equation, Complex order Kinetics, kinetics of some decompositions, strategy of stability testing, methods of stabilization, methods of accelerated stability testing in dosage forms, Freeze-Thaw methods, centrifugal methods, temperature and humidity control, Physical stability testing of pharmaceutical products.

18. Principles of Instrumental Analysis by Douglas A. Skoog, James, J. Leary, 4th Edition.

PAPER 104 - ADVANCED PHARMACEUTICAL TECHNOLOGY

UNIT- I

Preformulation studies: Goal of preformulation, preformulation parameters, Methodology, Solid state properties, Solubility & partition coefficient, Drug-Excipient compatibility.

UNIT- II

Formulation Development of Solid dosage forms:

Improved production techniques for tablets: New materials, processes, equipments improvements, high shear mixers, compression machines, coating machines, Coating techniques in tablet technology for product development, Physics of tablet compression and computerization for in process quality control of tablets.

Formulation Development of Powder dosage forms:

Formulation development and manufacture of powder dosage form for internal and external use including inhalation dosage forms.

UNIT- III

Formulation Development of Liquid and Semi-solid dosage forms:

Recent advances in formulation aspects and manufacturing of monophasic dosage forms, recent advances in formulation aspect and manufacturing of suspensions and semi-solid dosage forms.

UNIT- IV

Formulation Development of Parenteral dosage forms:

Advances in materials & production techniques, filling machines, sterilizers & aseptic processing

Formulation Development of Aerosols:

Advances in propellants, metered dose inhaler designs, dry powder inhalers, selection of containers & formulation aspects in aerosol formulation, Manufacture & quality control.

UNIT- V

Aseptic processing operation:

Introduction, Contamination control, Microbial environmental monitoring, Microbiological testing of water, Microbiological air testing, Characterization of aseptic process, Media and incubation condition, Theoretical evaluation of aseptic operations.

**PAPER 105 - ADVANCED BIOPHARMACEUTICS, PHARMACOKINETICS &
PHYSICAL PHARMACEUTICS LAB**

(Experiments based on Theory)

PAPER 106 - ADVANCED PHARMACEUTICAL TECHNOLOGY LAB

(Experiments based on Theory)

2nd SEMESTER

PAPER 201 - ADVANCES IN DRUG DELIVERY SYSTEMS

UNIT- I

1. Fundamentals of controlled drug delivery systems, use of polymers in controlled drug delivery, pharmacokinetic and pharmacodynamic basis of controlled drug delivery. Design, fabrication, evaluation and applications of the following controlled release systems.
 - a) Controlled release oral drug delivery systems
 - b) Parenteral controlled release drug delivery systems
 - c) Implantable therapeutic systems

UNIT- II

- d) Transdermal therapeutic systems and Iontophoresis
- e) Ocular and intrauterine delivery systems
- f) Bioadhesive drug delivery systems
- g) Proteins and peptide drug delivery

UNIT- III

Biochemical and molecular biology approaches to controlled drug delivery

- a) Micro particulate drug carriers; Liposomes, Niosomes, Microspheres, Nanoparticles and Resealed erythrocytes.
- b) Monoclonal antibodies

UNIT- IV

Drug targeting to particular organs:

- a) Drug delivery to respiratory system
- b) Problems of drug delivery to the brain and targeting to brain
- c) Drug delivery to eye
- d) Drug targeting in Neoplastic diseases

UNIT- V

Drug carrier systems targeted to widely dispersed cells

- a) Delivery to Macrophages
- b) Delivery to lymphoid cells of immune network
- c) Delivery to lysosomal storage diseases

6. Controlled Drug Delivery - Fundamentals and Applications, 2nd edition by Joseph R.Robinson and Vincent H.L.Lee.
7. Pharmaceutical Dosage forms, disperse system: Volume 1, by Herbert A.Libermann et.al, Marcel Dekker, Inc.
8. Pharmaceutical Dosage forms: Tablets Volume II, Herbert A.Libermann et.al, Marcer Dekker, Inc.
9. Bentley's Textbook of Pharmaceutics by E.A.Rawline, ELBS Publications.
10. Microencapsulation and Related Drug Process by Patric B.Deasy.

PAPER 202 - INDUSTRIAL PHARMACY - I

UNIT- I

A detailed study involving machinery and theory of pharmaceutical unit operations like Milling, Mixing, Filtration, Drying and Sterilization.

UNIT- II

Materials of construction of pharmaceutical equipment and packaging materials.
Study of the principles, production techniques and scale up techniques in the large scale production of tablets, capsules, emulsions, suspensions, sterile products, Semisolids and liquid pharmaceuticals, ophthalmic products.

UNIT- III

Production Management: Production organization, objectives and policies, good manufacturing practices, layout of buildings, services, equipment and their maintenance, materials management, handling and transportation, inventory management and control, production and planning control. Sales forecasting, budget and cost control, industrial and personal relationship.

UNIT- IV

Quality control, Process and Dosage form: Process control, control of manufacturing process, statistical quality control, control charts of automated process control, dosage form control, testing programme and method, product identification system, adulteration and misbranding , drug information profile.

UNIT- V

Process Validation: Regulatory basis, Validation of solid dosage forms, sterile products, liquid dosage forms. Process validation of raw materials, Validation of analytical methods, Equipment and Process.

12. Drug formulation manual by D.P.S. Kohli and D.H.Shah. Eastern publishers, New Delhi.
13. How to practice GMPs; By P.P.Sharma. Vandhana Publications, Agra.

14. Pharmaceutical Process Validation by Fra. R. Berry and Robert A. Nash.
15. Pharmaceutical Preformulations by J.J. Wells.
16. Applied production and operations management by Evans, Anderson, Sweeney and Williams.

PAPER 203 - INDUSTRIAL PHARMACY - II

UNIT- I

Pilot plant scale-up techniques : Significance, pilot study of some important dosage forms such as tablets, capsules and liquid orals, discussion on important parameters such as formula, equipments, product uniformity and stability, raw material process and physical layouts, personnel requirements and reporting responsibilities.

UNIT- II

Production, Planning, Control and Documentation : Production scheduling, forecasting, vendor development capacity assessment (Plant, machines, human resources), production management, production organisation, objectives and policies. Productivity, good manufacturing practices, guide to pharmaceutical manufacturing practices, guide to pharmaceutical manufacturing facilities, tablets and liquid orals, materials management and cost controls.

UNIT- III

Inventory management, Material Management and Maintenance

Management: Costs in inventory, inventory categories special considerations, selective inventory control, reorder quantity methods and EOQ, inventory models, safety stock-stock out, lead time-reorder time methods, modern inventory management systems, inventory evaluation. Materials-quality and quantity, value analysis, purchasing-centralized and decentralized, vendor development, buying techniques, purchasing cycle and procedures, stores management, salvaging and disposal of scrap and surplus. Selection of material handling systems, maintenance of material handling equipment, unitload, palletization and containerization, types of material handling systems. Classification of maintenance, corrective (breakdown) maintenance, scheduled maintenance, preventive maintenance, predictive maintenance.

UNIT- IV

Human Resource Development: Personal training, job specification, job enlargement and enrichment, blue and white-collar jobs. Labor welfare

Industrial hazards, pollution and effluent treatment: Introduction, Factory act and rules, fundamentals of accident prevention, organizing for safety, electrical hazards, industrial chemicals and their health hazards, material handling, Fire prevention and control, Physicochemical measurements of effluents, BOD, COD, Determination of some contaminants. Effluent treatment procedure, treatment of some characteristic effluent.

Industrial Safety: Industry hazards due to fire accidents, mechanical and electrical equipment, chemicals and pharmaceuticals, Monitoring and prevention systems. Industrial efficiency testing.

UNIT- V

ISO 9000 and 1400 Validation: Salient features, total quality management and productivity, process products and equipment and instrument validation.

Optimisation techniques in Pharmaceutical and Processing:

Optimization parameters, statistical design and other applications, design development and optimization of in-vitro test systems to evaluate and monitor the performance of different types of dosage forms, the relevance and importance of in-vitro/in-vivo associations at every stage of product development and manufacture, the regulatory evaluation and current thinking on this aspect, application of statistical techniques in product development and evaluation including quality control.

PAPER 204 - DRUG REGULATORY AFFAIRS
(Paper Common for all Specializations)

Unit - I

Formulation development: Regulatory requirements involved in the preformulation studies, solid, liquid and semi-solid dosage forms, controlled release preparations, injections, ocular preparations as per the European community, United States and Indian regulatory authorities

Unit - II

Manufacturing: Regulatory requirements as per European community, United States and Indian regulatory authorities for manufacturing information, manufacturing formula, process, validation of manufacturing process, equipment, documentation, inspection requirement of regulatory guidelines for active ingredients, data requirement for new drug, International aspects of Excipients, approval as per guidelines of all the territories. Regulatory guidelines for packaging materials, test and evaluation of packaging materials, biological test, elastometer test, microbiological test and evaluation of closures.

Unit - III

Stability testing: Scientific and technical background to the design of stability testing regulatory requirements as per European community, United States and Indian regulatory authorities for testing of new active substances, bulk active drug substances, dosage form in their final packaging. Extension of shelf-life after authorization of drug international harmonization and current guidelines. Regulatory affairs in respect of residual solvents as per the ICH guidelines, analytical method validation, pharmacokinetic and toxicokinetic validation.

Biopharmaceutics: Different testing parameters and standards as per regulatory requirements of European community, United States and Indian regulatory authorities with respect to factors related to formulation, dosage form, manufacturing process, stability and storage.

Unit - IV

Preclinical aspects of Biopharmaceutics: Current guidelines and developments as per regulatory requirements of European community, United States and Indian regulatory authorities in respect of clinical bioavailability , study design, presentation documentation and statistical analysis

Clinical pharmacology and Pharmacodynamics: Regulatory guidelines as per European community, United States and Indian regulatory authorities on clinical study design, documentation, presentation and interpretation. Clinical trials: Definition, phase I, phase II, phase III and phase IV studies, design documentation, presentation and interpretation, statistical analysis of clinical data and factorial design.

Unit - V

Intellectual property rights and patents: Introduction, purpose, international scenario and Indian scenario, guidelines as per European community, United States and Indian regulatory authorities, documentation, presentation and application, procedure for obtaining and writing a patent and patenting rules and regulations
